Yann Carlier

Senior Platform / DevOps Engineer

Based in Thailand/Hong Kong · Remote APAC · Open to relocation · linkedin.com/in/yanncarlier · github.com/yanncarlier

Hands-on platform and infrastructure engineer specializing in cloud, hybrid, and bare-metal systems, CI/CD, DevSecOps, observability, disaster recovery, and high availability.
Former founder, CTO, and Head of DevOps who stays close to architecture. Experienced in AI, automation, cybersecurity, crypto, blockchain, fintech, and trading platforms across Europe, APAC, and the Middle East.

> **Focus:** Technical leadership with hands-on delivery

Core skills

Cloud & platforms: AWS, GCP, Azure, Kubernetes, Docker, VMware, KVM, Proxmox

Infrastructure as code: Terraform, Ansible, SaltStack, GitOps

Delivery: GitHub Actions, GitLab CI, Jenkins, CI/CD, DevSecOps

Reliability: Linux, Prometheus, Grafana, ELK, HA, DR/BCM

Data & services: PostgreSQL, MySQL, Redis, Nginx, Apache, Cloudflare

Automation: Python, Bash, JavaScript, TypeScript, PHP, Node.js

Selected experience

Systems Engineering Consultant · Ambition

Hong Kong · On-site · Jul 2025 - Sep 2025

- Supported cloud and infrastructure services for APAC technology operations serving an international luxury retail brand.
- Contributed to multi-site data-center evaluation, migration strategy, hybrid-cloud architecture blueprints and capacity planning.
- Used AI-assisted workflows and prompt engineering to speed analysis, documentation and project delivery.

Founder & CTO · Set-Out

Hybrid · Oct 2012 - Jun 2025

- Built automated, resilient infrastructure and deployment platforms for high-availability client systems.
- Led hands-on architecture and cross-functional delivery of scalable applications with integrated DevSecOps pipelines.
- Designed and operated disaster recovery and business continuity solutions; improved release reliability through automation and infrastructure standardization.
- Recruited operations, systems and software engineers while retaining technical ownership.

DevOps & Web3 Lead · CoinMENA

Dubai · On-site · Sep 2021 - Apr 2022

- Helped shape Agile DevSecOps practices for a crypto and fintech environment.
- Worked across cybersecurity operations, compliance policies, security architecture, infrastructure and delivery processes.

CTO · Boost Rocket Ltd

Hong Kong · On-site · Sep 2018 - Aug 2019

- Helped build the company's hardware, software and engineering processes from the ground up.
- Planned and deployed CI/CD, DevSecOps and infrastructure for blockchain applications.
- Recruited engineers and operations specialists; coached Agile delivery and security awareness.

Head of DevOps · Diginex

Hong Kong · On-site · Feb 2018 - Jul 2018

- Planned and deployed CI/CD, DevSecOps and infrastructure for blockchain applications.
- Supported platform reliability, automation, security operations, service-desk, data-center and disaster-recovery processes.

Additional experience

DevOps Developer · Appnovation

Hong Kong · Jul 2017 - Jan 2018

- Defined client scope and implemented Atlassian-based platforms; delivered DevOps and Agile training.

Senior Infrastructure Engineer · ANX

Hong Kong · Apr 2016 - Jun 2017

- Engineered hybrid-cloud and bare-metal infrastructure and built CI/CD and DevSecOps pipelines.
- Planned and deployed trading-platform environments; supported data-center, service-desk and disaster-recovery operations.
- Recruited systems engineers and helped improve deployment reliability.

Earlier experience

Network Operations Manager, Macao Ignite · Macao · 2009-2011 - Critical infrastructure and vendor SLAs for data-center operations.

R&D Systems Engineer, C&C Lawyers · Macao · 2008-2013 - R&D across web, applications and infrastructure.

Systems Engineer, Portugal Telecom · Lisbon · 2007-2008 - Microsoft and Linux administration for large-scale platforms and data-center work.

Network Engineer, ISINET · Lisbon · 2006-2007 - Data-center operations, networking and Cisco/HP infrastructure.

IT Manager, DOISBR / ADD · Lisbon · 2001-2006 - Infrastructure, ERP, e-commerce, vendors, SLAs and engineering teams.

Full Stack Engineer / Web Developer / Graphic Designer · Portugal · 1998-2001 - E-commerce, payments, web systems and digital delivery.

Technical toolkit

AWS · GCP · Azure · Akamai · Cloudflare · VMware · KVM · Proxmox · Docker · LXD · ZFS · Kubernetes · Terraform · Ansible · SaltStack · GitHub Actions · GitLab · Jenkins · Linux · Ubuntu · Red Hat · PostgreSQL · MySQL · Redis · Python · Bash · JavaScript · TypeScript · PHP · Node.js · React · Next.js · Rust · Solidity · Web3 · Prometheus · Grafana · ELK · Nginx · Apache

AI and emerging tooling

Practical use of AI-assisted workflows and prompt engineering. Current tooling and study include Llama.cpp, CrewAI, LangChain, Anthropic and DeepLearning.AI material. Strong interest in the intersection of crypto infrastructure and AI platforms.

Positioned as current interest and development, not claimed production AI-platform experience.

Education

University of Algarve (UAlg ESEC)
Design and Multimedia Technologies · 1995-1997

Liceu de Macau
Art and Design · 1986-1992

Professional development

Training spans cloud architecture, DevOps, IAM, security, Kubernetes, IT service management, enterprise architecture, project management, programming, smart contracts, machine learning and prompt engineering.

Add issuer, credential name and year only for certificates that can be verified.

Work preferences

Primary target: remote APAC hands-on platform, DevOps or SRE roles. Also open to UAE roles and technical-lead responsibilities that remain close to engineering delivery. Work authorization and relocation details to be confirmed for each jurisdiction.
