Senior Platform Engineer, DevOps & AI

Senior technology leader with 20+ years of experience building and operating resilient platforms, cloud and hybrid infrastructure, DevSecOps pipelines, and AI-enabled systems. Proven track record leading infrastructure modernization, high-availability deployments, and product delivery across fintech, blockchain, e-commerce, and enterprise environments.

Core Skills

- AI systems architecture, agentic workflows, local inference stacks, LLM tooling.
- Platform engineering, SRE, DevOps, CI/CD, IaC, automation-first delivery.
- Cloud and hybrid infrastructure, data centers, virtualization, bare metal, storage.
- Security, compliance-aware architecture, identity, access, network hardening.
- Full-stack delivery, web and mobile products, APIs, infrastructure for SaaS.
- Leadership, technical strategy, cross-functional execution, Agile coaching.

Experience

Founder | Carlier

Oct 2025 – Present | Remote

- Building AI-native autonomous agent platforms and local inference stacks for practical deployment.
- Developing mobile and web SaaS products powered by agentic workflows and automation.
- Exploring applied ML, trading automation, and cost-optimized AI infrastructure.

System Engineering Consultant | Ambition

Jul 2025 – Sep 2025 | Hong Kong | On-site

- Supported cloud and infrastructure services for APAC tech operations for a leading international luxury retail brand.
- Contributed to multi-site data center evaluation and migration strategy.
- Produced architecture blueprints and capacity planning materials for hybrid cloud transition.
- Used AI-assisted workflows to accelerate analysis, documentation, and project delivery.

Founder & CTO | Set-Out International

Oct 2012 – Jun 2025 | Hybrid

- Built automated, resilient infrastructure and deployment platforms for high-availability client systems.
- Led cross-functional engineering efforts to deliver scalable applications with integrated DevSecOps pipelines.
- Reduced operational risk and improved release reliability through automation, standardization, and infrastructure design.

DevOps & Web 3.0 Lead | CoinMENA

Sep 2021 – Apr 2022 | Dubai | On-site

- Helped shape an Agile DevSecOps culture for a blockchain and trading platform environment.
- Worked on cybersecurity operations, compliance policies, and security architecture.
- Supported infrastructure and delivery processes aligned with industry standards.

CTO | Boost Rocket Ltd

Sep 2018 – Aug 2019 | Hong Kong | On-site

- Helped design and build the company's hardware and software stack from scratch.
- Served as Scrum Master and coached teams on Agile practices and security awareness.

Head of DevOps | Diginex

Feb 2018 – Jul 2018 | Hong Kong | On-site

- Planned and deployed infrastructure for blockchain applications.
- Supported platform reliability, automation, and security-focused operations.

DevOps Developer | Appnovation

Jul 2017 – Jan 2018 | Hong Kong | On-site

- Worked with clients to define project scope and implement Atlassian-based platforms.
- Delivered DevOps and Agile training to strengthen collaboration and continuous improvement.

Senior Infrastructure Engineer | ANX International

Apr 2016 – Jun 2017 | Hong Kong | On-site

- Engineered hybrid cloud and bare-metal infrastructure.
- Built CI/CD pipelines and improved deployment reliability and disaster recovery.
- Defined DevSecOps and support processes for data center operations.

Network Operations Manager | Macao Ignite Technology

May 2009 – May 2011 | Macao | On-site

- Managed critical IT infrastructure and vendor SLAs for data center operations.
- Led research and development efforts in web development and cloud infrastructure.

System Administrator | Portugal Telecom

Jun 2007 – Sep 2008 | Lisbon | On-site

- Administered Microsoft and Linux systems for large-scale platforms.
- Supported data center projects to improve infrastructure reliability and performance.

Network Engineer | ISINET

Sep 2006 – Apr 2007 | Lisbon | On-site

- Supported data center operations, network projects, and client delivery.
- Configured Cisco and HP networking equipment to improve connectivity and security.

IT Manager | DOISBR

Jun 2004 – Sep 2006 | Lisbon | On-site

- Managed infrastructure and software projects, including ERP and intranet platforms.
- Automated operational tasks with scripting to improve efficiency.

IT Manager | ADD - Armazem de Dados

Aug 2001 – Jun 2004 | Lisbon | On-site

- Managed e-commerce and ERP projects, vendor relationships, and SLAs.
- Supervised engineers and developers across system delivery initiatives.

Full Stack Engineer | Inteliware E-commerce

May 2001 – Aug 2001 | Lisbon | On-site

- Developed B2B and B2C e-commerce platforms with payment integration.

Web Developer | Model-Car

Mar 1999 – May 2001 | Porto | On-site

- Built e-commerce systems and supported digital marketing and platform integration.

Graphic Designer | Universidade Catolica Portuguesa

Aug 1998 – Mar 1999 | Porto | On-site

- Designed and coded websites and produced print publications.

Education

- University of Algarve (UALg ESEC), Design and Multimedia Technologies, 1995–1997
- Liceu de Macau, Art and Design, 1986–1992

Certifications and Training

Highlights include AWS Solutions Architect Associate, PMP, CISA, ITIL v3, Linux Foundation DevOps and Kubernetes training, Atlassian administration, blockchain development, Anthropic, Langchain, DeepLearning.AI and other multiple AI/LLM courses from 2019–2026.

Tools and Technologies

AWS, GCP, Azure, DigitalOcean, Akamai, Cloudflare, Proxmox, VMware, KVM, Docker, LXD, ZFS, Kubernetes, Terraform, Ansible, GitHub Actions, GitLab CI, Linux, Ubuntu, Red Hat, PostgreSQL, MySQL, MongoDB, Redis, Python, Bash, JavaScript, PHP, Node.js, React.js, Rust, Flutter, Solidity, Web3, Prometheus, Grafana, ELK, Nginx, Apache, Llama.cpp, CrewAI, LangChain, OpenClaw, and other modern AI tooling.
